

## Description

The DETEXI NVR system can now be accessed through an NVR Remote PDA Client. This software is loaded onto your Pocket PC (Windows CE 3.0 or greater) which allows you access to all cameras on your DETEXI system. This client can be used with 802.11 as well as CDMA or GPRS wireless technologies.

*Note: Pocket PC is not included*

## NVR Remote PDA Client

**EE-PDA-10001 - 1 PDA install**

**EE-PDA-10002 - 5 PDA installs**

**EE-PDA-10003 - 10 PDA installs**

## Key Features

- Allows you to stay connected to your DETEXI Surveillance system from virtually anywhere
- Stand-Alone and Client-Server mode, with easy switching between modes
- Authenticates with a DETEXI NVR system using configured User IDs and Passwords just as the regular DETEXI client does, seeing only authorized cameras
- Can view live or historical video from the NVR system
- Bandwidth management tools with user selectable resolution for instance
- Position presets for PTZ (Pan/Tilt/Zoom) cameras are supported, as well as manual control of the camera positions
- The ability to interrupt PTZ camera tours for manual control of the cameras
- Automatic login option
- The ability to control outputs (or relays) built into the cameras
- To use the entire screen space of the handheld, the image can be rotated by 90°, while still providing PTZ control if applicable

## System Requirements

- Windows CE 3.0 or greater
- 350 KB storage space for install
- 802.11, CDMA, or GPRS wireless connectivity

## Optional Add-on Modules

- **NVR Startup Assistance**  
On site startup assistance with system configuration and training
- **Birds Eye View**  
Discover, map out, and manage your network topology for easy network management and troubleshooting

*Connection – Detection - Response*
